

In the United States District Court
For the Middle District of North Carolina
Greensboro Division

Defendant, Brian David Hill

v.

Criminal Action No. 1:13-cr-435-1

Plaintiff, United States of America

NEW EVIDENCE BY DEFENDANT

Defendant submits NEW EVIDENCE to the court for any purpose in regards to the Criminal case. The evidence the defendant submits is as follows.

1. COMPLAINT filed with the North Carolina Office of the Ombudsman to the crime lab under the N.C. Department of Justice. Dated and filed through fax machine 1/23/2015 1:11:56 AM (transmission ticket receipt included). Complaint is in regards to NC State Bureau of Investigation Special Agent Rodney White that conducted the analysis for the state crime lab in regards to SBI case #2012-02146, the exact case number of the state crime lab report used in evidence against the defendant.
2. COMPLAINT filed with the North Carolina Office of the Ombudsman to the crime lab under the N.C. Department of Justice. Dated and filed through fax machine 1/2/2015 7:25:48 PM (transmission ticket receipt not included due to technical malfunction which caused the ticket to be not readable). Complaint is in regards to concerns with the NC Triad Crime Laboratory conducting analysis on evidence that was already previously examined by Reidsville, NC Police Detective Robert Bridge which violates state crime lab policy. Because Detective Bridge was not a forensic crime laboratory scientist and went on the defendant's laptop hard drive himself without oversight, it may very well be construed as evidence tampering.

Both complaints are to start formal investigations into the violations of state criminal Laboratory procedure and standards set forth by the North Carolina State

Bureau of Investigation (SBI) and accreditation standards. Because of the multiple blatant violations of crime lab policy and procedure, this harms the defendant in being able to prove his own legal innocence in a jury trial when under ineffective counsel in addition to the rights violated of the defendant.

The defendant was never able to object to the evidence used by the U.S. Attorney due to Philip Edward Berger Jr. violating North Carolina Article 7C, §8-58.20 (See Document #49, Filed 10/06/14, Page 5 of 10) by failing to serve the defendant with the crime lab report and affidavit as mandated by state law for admissibility of state evidence. Philip Berger Jr. is the former District Attorney of Rockingham County whom received the original copy of the State crime lab report conducted by SBI in 2013 which is in the record of the evidence used against the defendant. Because the defendant wasn't served the crime lab report, the defendant had **his right** to object to usage of the crime lab report **violated**. Because of that right being violated the defendant was never able to bring up issues he had with the state crime lab report before being used as evidence against him. His right to object was violated then that evidence was used by the ineffective counsel Eric Placke to coerce him into pleading guilty when the defendant believes in his own legal innocence to the charge. Even if the federal court allows the inadmissible state evidence that violates state admissibility law, it proves how dirty the evidence was obtained by the prosecution to prosecute and convict the defendant.

Respectfully submitted,

Brian D. Hill

Resolution Attempts You Have Made

Have you shared your concerns with the SBI?:

No Referring to NC DOJ/SBI - Joy Strickland
 Yes Did not submit this

If so, what was the result of your contact?:

No response yet concern with Agent White

* What resolution would you consider fair?:

That a Virus Log be created by the state crime lab,

Otherwise it gives further reason as to why the state should withdrawl their evidence from the U.S. District Court since the evidence is no longer reliable with conflicting evidence of the eMule virus Affidavit/Declaration statements, with the state crime lab evidence. That in addition to the evidence tampering complaint filed through FAX in December, 2014.

* Will you be submitting documentation by mail, email or fax?:

No

Technical Procedure for Writing Results Statements

1.0 Purpose - This procedure presents the approved statements that shall be used for reporting digital evidence analysis results in the State Crime Laboratory.

2.0 Scope - This procedure applies to all written result statements for digital evidence analysis in the State Crime Laboratory.

3.0 Definitions

- **Standard Computer Result Statements** – Result statements which are common for all computer cases regardless of the type of case being examined.
- **Non-Standard Computer Result Statements** – Result statements which vary in their content due to the nature of the data being bookmarked and/or due to the nature of the case being worked.

4.0 Equipment, Materials and Reagents

4.1 Equipment and Materials

- Computer with Forensic Advantage (FA) application

4.2 Reagents – N/A

5.0 Procedure –Analyses shall include an accurate interpretation of the actual results of the examination in a manner approved by the Forensic Scientist Manager or his/her designee and the Crime Laboratory Director. This interpretation may include or build upon one (1) or more of the following responses depending on the circumstances of the case and the nature of the digital evidence examination. The order in which the statements are arranged is left to the discretion of the Forensic Scientist. Deviations shall be approved according to the Laboratory Procedure for Authorizing Deviations.

5.1 Recovered Disc Reporting Method

5.1.1 Computer Result Statements

- 5.1.1.1 This report has been generated in association with Item (Item Number), which should be viewed in conjunction with this written report.
- 5.1.1.2 No data of interest were located on Item (Item number).
- 5.1.1.3 Item (Item number) was unable to be processed for digital evidence because (reason).
- 5.1.1.4 Item (Item Number) was/were scanned for threats using (software) with definitions dated (date). The virus scan log is available for review in the “Recovered\Virus Scan Logs” folder on Item (Item Number).
- 5.1.1.5 (Number) Encrypted file/files of possible interest was/were recovered from Item (Item Number) and is/are available for review in the “Recovered\Encrypted Files” folder on Item (Item Number).

State of Virginia
County of Henry
City of Martinsville

BEFORE ME, the undersigned Notary,

_____ [name of Notary before whom
affidavit is sworn], on this _____ [day of month] day of _____ [month],
20____, personally appeared _____ [name of
affiant], known to me to be a credible person and of lawful age, who being by me first duly sworn, on
_____ [his or her] oath, deposes and says:

Around sometime of July 2012, cannot remember the day but the problem may have lasted for anytime between less then one week to two weeks. Also at that time I did no remember using any Anti-virus software on my computer, and had to keep reminding myself to get the software and install on my computer but I cannot remember if I ever did, which means I don't think I used a anti-virus and if I did I would have clearly recalled. I started noticing that emule.exe was running along with three other programs. Conime.exe, ares.exe, and shareaza.exe. I believe the main program that was rogue and was running was emule.exe. It didn't run under the normal programs. This program ran without my consent, and without my knowledge until I discovered the program running in task manager. I had ended the tasks thinking this Trojan was gone but then days later I noticed that the hard drive space on my computer was out at 0k. I decided to open the program location using the task manager. I noticed it appeared to be a portable version of eMule, at least the folder structure looked similar. I clicked on the shared files folder and saw hundreds of files with names I didn't understand. Some of those names from what I could remember said 9yo, pthc, ptsc, and other terms. I assumed it was just some viruses being shared and deleted everything. I had no idea what was shared or that it was something that would get the police after me. Then I tried to sabotage the virus since it took over my computer and made it difficult to fight against. I even recall a bit about calling my grandmother on the phone telling her that I was fighting a virus or Trojan, and that is really all I recall. So I know I had called my grandmother telling her about this Trojan, and took days to put a stop to, if that was even enough as it could have still ran, but I wouldn't know. I believe there may be other Trojans running on the computer too due to the weird programs that were running. I should have restored my computer but did not because I had a lot of data I would have to move off the computer to conduct the restore.

Honestly if I had known that the Trojan horse was sharing something serious that got me in trouble, if I had known earlier what was being shared then I would have reported the incident to the FBI or the NCMEC and sent the sample of this Trojan horse to Anti-Virus companies for examination then have
